## SL and AS MULTIFUNCTIONAL PEDALS

allow to progressively work until the pre-set maximum speed

### SL multifunctional pedal

Progressive increase of the speed of both Micromotor and Turbine

### Horizontal shifting on “A” lever:

activation and adjustment of dynamic instruments (Micromotor und Turbine) rotation speed.

### AS multifunctional pedal

Progressive increase of the micromotor speed  
The turbine is activated to the maximum speed **only**

### Horizontal shifting on “A” lever:

Turbine activation.  
Action and adjustment of Micromotor rotation speed.

### Vertical shifting on “A” lever when dynamic instruments are not active:

activation of dynamic instruments chip-blower function.

### Vertical shifting on lever “A” when dynamic instruments are active:

spray activation both in continuous and sequential way

## SMD ADDITIONAL SECURITY SYSTEMS:

- **Hydro Stop:** air flux automatically activated any time the micromotor stops working to avoid cross contaminations
- Impossibility to work with spray and suction at the same time
- Impossibility to work if compressor is not connected to the unit
- Impossibility to work if the bottle containing water is not pressurized
- Activation of only one instrument at a time
